

ph::math::TUniformRandomBitGenerator< Pcg32, uint32 >

ph::math::Pcg32

```
graph BT; A[ph::math::Pcg32] --> B[ph::math::TUniformRandomBitGenerator< Pcg32, uint32 >]
```

The diagram illustrates an inheritance relationship. A vertical arrow points from the text 'ph::math::Pcg32' in the bottom box to the text 'ph::math::TUniformRandomBitGenerator< Pcg32, uint32 >' in the top box, indicating that the top class inherits from the bottom class.
